REPORT DESCRIPTION

The increasing road traffic had raised the demand for installation of safety and support systems in vehicles. Steel crash barrier systems provide safety and support for the vehicle moving away from the traffic path to the area outside the lane. Crash barrier system is a protection used to avoid infrastructural damage, surface car park allocation, and approach lane containment where there is risk to the motorist. The crash barrier systems hold and redirect the uncontrolled vehicle, thereby saving the passengers from injury and ensuring safety for both, vehicle and passenger.

Crash barrier systems market is segmented on the basis of:

- > Type
- > Material Property
- > Devices
- > Applications
- > Geography

Based on Type, the crash barrier system market can be segmented into

- > Movable Barrier System
- > Immovable Barrier System

Based on the Material Property, the crash barrier system can be categorized into

- > Rigid Barrier
- > Semi-Rigid
- > Flexible Barrier

Based on the Devices, the crash barrier market can be segmented into

- > Guardrails Energy Absorbent Terminals (GEAT)
- > Crash Cushions
- > Water and Sand Filled Plastic Barriers
- > Gating and Non-Gating End Treatment
- > Others (brakemaster, hex-foam sandwich systems, and low-slung maintenance attenuators)

Based on the End User Applications, the crash barrier market can be segmented into

- > Median Barriers
- > Bridge Barriers
- > Roadside Barriers
- > Work Zone Barriers
- > Others (pedestrian foot-path barriers, hilly terrains, and racing tracks)

On the basis of Geography, the crash barrier systems market can be segmented into five major regions which include:

- > North America
- > Asia Pacific
- > Europe
- > Middle East & Africa
- > Latin America

Growing awareness towards the adoption of safety measures is one of the factors driving the growth of crash barrier system market, globally. The major companies such as Avon Barrier Corporation Ltd., are focusing on providing additional rigidity to the barrier system for maximizing safety. Increasing investment in infrastructural development such as roads, airports, coupled with the rising automotive industry are some key factors stimulating the growth of crash barrier system market across the globe. Increasing demand for automobiles is resulting in the rising safety concerns to avoid any mishap or fatal accident. Thus, crash barrier system is the safety measure used to prevent the vehicle from going off the lane thereby providing safety for passengers.

Some of the major players in crash barrier systems market include

- > Lindsay Corporation (U.S.)
- > Tata Steel Limited (India)
- > Avon Barrier Corporation Ltd. (U.K.)
- > Trinity Industries, Inc. (U.S.)
- > Nucor Corporation (U.S.)
- > Valmont Industries, Inc. (U.S.)
- > Transpo Industries, Inc. (U.S.)
- > Arbus Limited (U.K.)
- > NV Bekaert SA (Belgium)
- > Hill & Smith Holdings PLC (U.K.)

About TMR

Transparency Market Research (TMR) is a global market intelligence company, providing global business information reports and services. Our exclusive blend of quantitative forecasting and trends analysis provides forward-looking insight for thousands of decision makers. TMR's experienced team of Analysts, Researchers, and Consultants, use proprietary data sources and various tools and techniques to gather and analyze information.

Our data repository is continuously updated and revised by a team of research experts, so that it always reflects the latest trends and information. With a broad research and analysis capability, Transparency Market Research employs rigorous primary and secondary research techniques in developing distinctive data sets and research material for business reports.
